

Conducting Research Responsibly in Global Health

April 15 – June 23, 2019

Carey Farquar, MD, MPH; Alison Drake, MPH, PhD

10 weeks, 6-9 hours per week

This course is designed to train participants in the development and conduct of research globally, with an emphasis on low-resource settings. Topics covered include proposal writing, quantitative and qualitative study designs, designing study instruments, data management, budget and grants management, research ethics and human subjects, manuscript development and presentation skills. It was created to provide participants anticipating a research-oriented career with the tools they need to develop and design a research study, write a successful proposal, and conduct research independently in an international setting.

Format

This online graduate-level course has video lectures, readings, discussion forums, quizzes, and assignments.

You can participate in this course as an independent participant or as part of a site with five or more people. We encourage participation as a group because it provides a forum for discussing course concepts and applying them to the local setting and customs. If you can't join a group, the discussion boards can provide that forum.

The course is taught in English.

**Note that this is the first pilot run of the course so number of participants is limited, and additional feedback from participants is required.*

Eligibility

To be admitted to the course, you must have a Bachelor's-level degree or equivalent and experience in a health-related field.

Fees

Low- & middle-income countries

Local sites: \$1500 (5-40 participants)

Independent participants:
\$299 (mailed certificate) or
\$199 (digital certificate)
